A 10x10 grid of 100 small circles, each containing a number from 0 to 9. The numbers are arranged in a pattern that resembles a random distribution, with some numbers appearing more frequently than others. The grid is composed of 10 rows and 10 columns of circles.

The dot plot displays the number of children in each age group (0-4 to 15-19) for nine countries. The y-axis represents the number of children, ranging from 0 to 100,000,000. The x-axis lists the countries: USA, Canada, Mexico, Brazil, India, China, Russia, South Africa, and Australia. Each country has a horizontal line with dots representing the number of children in each age group. The USA and Canada have the highest number of children in the 0-4 age group, while India and China have the highest number of children in the 15-19 age group.

A 10x10 grid of dots representing a sparse matrix. The dots are arranged in a pattern that suggests a banded structure, with a higher density of dots along the main diagonal and some off-diagonal elements, particularly in the upper and lower triangles. The dots are small black circles on a light gray background.

The image displays a highly detailed, abstract pattern of black dots on a white background. The dots are arranged in a way that suggests a fragmented or pixelated representation of a character, possibly the letter 'A'. The pattern is composed of numerous small dots, some of which are clustered together to form a solid, dark shape in the upper right quadrant. The overall effect is that of a high-resolution, pixelated or dithered image, where the individual dots are clearly visible against the white background.

A 10x10 grid of 100 small black squares arranged in a 10x10 pattern on a light gray background. The squares are arranged in a regular grid, with 10 squares per row and 10 squares per column. The grid is composed of 10 rows and 10 columns, totaling 100 squares.
